ARTIFICIAL INTELLIGENCE & BUSINESS LEADERSHIP

The velocity with which data is being captured and the momentum with which technology is being curated make this a revolutionary time for business. The goal of this course is to introduce students to Al, and to equip future managers with an understanding of its practical applications in business.

Program Highlights:

GAIN A NEW MANAGEMENT PERSPECTIVE:

Learn how AI insights and implications can become powerful tools in shaping business strategy and leading an organization.

BENEFIT FROM HIGHLY EXPERIENTIAL LEARNING

Put theory into practice as you learn fundamentals about natural language processing, image classification and predictive modeling.

EXPLORE A CHANGING ETHICAL LANDSCAPE

Examine some of the ethical and philosophical issues surrounding AI and its increasing presence in our society.

IMMERSE YOURSELF IN A CULTURE OF INNOVATION

Experience and learn from organizations firsthand, with exciting site visits to businesses in Toronto's booming technology sector.

Toronto: a Global Epicenter for Research in Al

The Toronto Region boasts a world-renowned ecosystem for innovation; one that connects technology multinationals, research superclusters, academic institutions and private investors.

The World's 1st National Al Strategy

focused on supporting research and developing talent

\$125 million

Pan-Canadian Artificial Intelligence strategy backed by the Government of Canada

Toronto is home to the

Highest Concentration of Al Start-ups in the World

supported by the MaRS Discovery District, venture LAB, the Durham ${\sf College\ AI/HUB\ and\ more}$
